## **1.0 PURPOSE**

The intent of this Request for Proposal is to establish a contract through competitive negotiations with a qualified and experienced contractor for meter reading services for the Department of Public Utilities.

## **2.0 BACKGROUND**

The City requires an outside source/single contractor to provide meter reading services associated with water usage for the entire area in order to accurately bill users for the utilities provided to the residents of Suffolk.

## **3.0 COMPETITION INTENDED**

It is the City's intent that this Request for Proposal (RFP) permits competition. It shall be the offeror's responsibility to advise the Purchasing Agent in writing if any language requirement, specification, etc., or any combination thereof, inadvertently restricts or limits the requirements stated in this RFP to a single source. Such notification must be received by the Purchasing Agent not later than five (5) days prior to the date set for acceptance of proposals.

## **4.0 TERM OF CONTRACT**

The initial term of the contract shall be for one (1) year beginning January 1, 2016 and continuing through December 31, 2016.

This contract may be renewed based on the terms and conditions at the expiration of its term at the sole discretion of the City. Automatic renewals will occur for up to four (4) additional one-year periods through December 31, 2020.

Initial rates and subsequent renewal rates must be guaranteed for a minimum of 12 months. Any request for an increase in rates following the initial contract period shall be determined by the percentage defined in the "Transportation" Category of the PI-W section of the Consumer Price Index of the United States Bureau of Labor Statistics for the latest twelve (12) months for which statistics are available. Price increases shall be justified in writing and must be approved by the City. The City does not guarantee any rate increase.

## **5.0 SCOPE OF SERVICES**

### **A. General**

The Contractor is required to read approximately 26,000 water meters per month, conforming to the City's monthly meter reading schedule, maintaining a 28- to 32-day bill period. The City has three (3) types of meters in its system: manual read, touch read, and radio read. Pricing of reading each type of meter is requested.

Six (6) routes will be read daily, Monday through Friday, approximately 18 work days per month. The 19 work days are required to allow for holidays and inclement weather. All routes are expected to be read in their entirety on the day issued by the City, unless otherwise approved. Adverse weather conditions will not relieve the Contractor of reading responsibilities, unless approved by the City.

Routes consist of approximately 250-400 meters. The City may change existing route structure(s) to include new accounts and improve uniformity, and the Contractor is required to maintain the route schedule. The Contractor's work day will begin no earlier than 7:00 a.m., with all work to be completed and returned to the City by 3:30 p.m. The Contractor's supervisor will be responsible for getting handheld units from the City to their contract employees and returning completed units to the City each day.

The number of meter readings provided herein is estimated and does not obligate the City to any specific number of meter readings during the contract period.

**B. Backreads**

If a reading is not acquired for an account, a backread will be generated the next work day. All backreads shall be completed by the Contractor's employees on the day received. The Contractor shall be assessed a penalty for each backread issued. The penalty shall be fifteen dollars (\$15.00) per backread and an additional fifteen dollars (\$15.00) for each day the backread is not completed.

The City is responsible for providing reasonable access to the contractor for all meters assigned. The Contractor will not be assessed a penalty if it is determined, after review, that access to a meter was not available. If the City determines that a meter is not available, the City will perform the backread without penalty to the Contractor.

The Contractor shall notify the City of any hazardous or irregular situations observed at the meter reading sites by entering appropriate code in hand held unit or by forwarding pertinent information to the City in writing, showing address and scope of problem.

**C. Miss-Reads**

In the event that the City determines that the Contractor's meter reading was in error, the Contractor shall be assessed a penalty of fifteen dollars (\$15.00) and shall not be paid for the initial meter reading.

**D. Payment**

The Contractor shall be paid monthly for the number of meters read, based on the contract rates, less any backread and miss-read penalties.

E. Supervision

The Contractor shall provide appropriate local and on-site supervision daily for contract employees working in the City of Suffolk. The Supervisor shall coordinate reading schedules with the City and shall be readily accessible by phone during normal working hours for problem resolution.

The Contractor will be responsible for scheduling and arranging work assignments, field monitoring of meter readers, monitoring reader activity from reports, preparing management reports, and resolution and follow-up of customer complaints related to Contractor reading.

The Supervisor must demonstrate to the City's satisfaction, effective communications skills, both written and verbal, to facilitate coordination of the work with City staff and ensure progress of the work in a timely and effective manner. The Supervisor shall represent the Contractor and all communications given to the Supervisor shall be as binding as if given to the Contractor.

F. Meter Reading Environment

With few exceptions, all meters are pit set. High water tables or inclement weather may cause pits to flood, making pumps and viewing tubes necessary equipment. Contractor employees shall be required to clean out meter boxes as necessary in order to acquire meter reading.

G. Equipment

The City will provide meter reading units, as well as the software and hardware required to upload and download meter reading information.
