

APPENDIX 1

Pavement Patch Restoration Detail shall be the standard for Asphalt Pavement repairs.

VDOT Select Fill Type I, II, or III and 21A shall be in place and compacted during initial restoration.

Contractor shall use this detail to estimate the required asphalt pavement necessary to complete the restoration.

Saw cut shall be in a straight line and full depth of asphalt patch.

If contractor finds initial restoration material unsuitable, contractor shall notify Public Utilities and/or Public Works immediately to determine the method of restoration.

Removal and replacement of 21A and VDOT select Fill Type I, II, or III shall be accomplished utilizing Bid item Bedding Material-21A and Select Fill.
