PURPOSE

The intent of this Invitation for Bid (IFB) is to enter into an annual contract with one (1) contractor to provide Fire Hydrant Maintenance and Inspection Services for approximately 2,900 hydrants for the Department of Public Utilities.

COMPETITION INTENDED

It is the City's intent that this Invitation for Bid (IFB) permits competition. It shall be the bidder's responsibility to advise the Purchasing Agent in writing if any language requirement, specification, etc., or any combination thereof, inadvertently restricts or limits the requirements stated in this IFB to a single source. Such notification must be received by the Purchasing Agent not later than five (5) business days prior to the date set for bids to close.

CONTRACT PERIOD

The contract shall cover the period from February 1, 2022 through January 31, 2023.

The City reserves the option to renew this agreement for four (4) additional one-year periods ending January 31, 2027. Unless notified in writing thirty (30) days prior to the expiration date, the contract will automatically renew during these periods.

Initial rates and subsequent renewal rates must be guaranteed for a minimum of twelve (12) months. Any increase in rates shall be limited to the lesser of the Consumer Price Index for all Urban Consumers (CPI-U) – Other Goods and Services (unadjusted for the current 12 month period) or 3%. The City does not guarantee approval of any rate increase. **The City must be notified of any rate increases during the contract period.**

SCOPE OF WORK

A. General

1. The contractor will be responsible for completing the inspection and regular hydrant maintenance of approximately 2,900 fire hydrants in the City of Suffolk. This service shall be performed in accordance with the American Water Works Association manual M17, "Installation, Field Testing and Maintenance of Fire Hydrants."
2. The fire hydrants shall be inspected once between April 1, 2022 and October 31, 2022.
3. Scheduling and reporting will be coordinated through the Data Quality Control Technician of the Department of Public Utilities. The hydrants will be inspected in a predetermined sequence. The Data Quality Control Technician will provide all scheduling, and work production will be based on CityWorks generated inspection work orders. Average number of inspections per day should be approximately twenty to twenty five (20-25) in an eight (8) hour workday based on a one-man crew.

Work schedule shall conform to that of the City of Suffolk---Monday through Friday from 7:30 a.m. to 3:30 p.m., excluding City holidays.

4. All repairs (hydrant replacement, dismantling, etc.) will be performed by the Department of Public Utilities, Line Maintenance Division. If a hydrant is found in need of repair, the Data Quality Control Technician will be notified indicating record location, time, reasoning and person reporting.
5. Contractor's vehicle must be clearly marked "Hydrant Maintenance" along with Company's Name and phone number on the outside of both side doors.
6. The contractor shall be responsible for obtaining all required work permits and for providing proof to the City of adequate public liability insurance.
7. The contractor shall be responsible for weed trimming and removal of weeds within a two foot (2') radius around each fire hydrant.
8. Contractor shall provide appropriate traffic control signing and/or flagmen in accordance with the local jurisdiction's regulations and the Virginia Work Area Protection Manual.

B. Obtaining, Entering, and Returning Work Procedures

All hydrant inspections will be broken up into groups and scheduled by the Department of Public Utilities. Hydrant inspection work orders will be given to the Contractor on a weekly basis using Cityworks software. This issuing of hydrant inspections must be done at 442 W. Washington St. and will be coordinated by the Data Quality Control Technician.

Hydrant inspection work orders will be completed in the field by the Contractor as the inspection is completed.

Once all hydrant inspections in one group given to the Contractor are completed, the Data Quality Control Technician will issue to the Contractor the next group of hydrant inspections. The Contractor will access the work orders through a mobile device with internet access.

When a group of hydrant inspections is turned into the Department of Public Utilities, the Department will check for hydrant inspection completeness within the group as well as make random field visits to verify the hydrant inspections have been accurately reported by the Contractor. One week of field verification time must be passed after a group of hydrant inspections are turned in before payment for a group will be processed.

The Department of Public Utilities will provide the Contractor with the data necessary to utilize the mapping capabilities of Cityworks software.

C. Inspection Procedures

All hydrant inspections will be performed in accordance with the following procedures:

- Check the hydrant's overall appearance. Check the accessibility to the hydrant, including any interference from poles, fences, shrubbery, or any object that could interfere with the effective operations of the hydrant. Report any situation that cannot be resolved immediately. Bushes, trees, plants and other shrubbery in the area of

hydrant that could restrict operation or block the view, should be reported to the Line Maintenance Manager for resolution.

- Verify the hydrant's Facility ID, location, and model for adherence to the specified hydrant record and note any discrepancies in Cityworks. Also check branch valve location and make necessary notes as required and instructed.
- Check to see if hydrant needs to be adjusted to meet standards for hydrant setting, i.e. breaker ring to the ground and surface specifications.
- Remove one outlet-nozzle cap and use a listening device to check for leaks.
- Check for the presence of standing water or ice in the hydrant barrel.
- Replace the outlet-nozzle cap. Leave it loose enough to allow air to escape, but secure enough to prevent removal. Locate the hydrant branch valve (it may be necessary to utilize a metal detector in some cases). Install valve key on branch valve in case of hydrant failure before proceeding.
- Standing behind the hydrant (away from nozzle caps) open the hydrant only a few turns. Allow air to vent from the outlet-nozzle cap.
- Tighten the outlet-nozzle cap.
- Open the hydrant fully, (staying away from direction of nozzle caps). Check for ease of operation.
- With the hydrant fully open, check for leakage at flanges around outlet-nozzles, at packing or seals, and around the operating stem. Replace nozzle cap gaskets as needed.
- The condition of the operating nut, stem assembly, main valve, bleeder, nozzles, threads, breakaway device (breaker coupling not broken and no missing nuts or bolts), and all other serviceable parts shall be observed and documented on inspection work order sheets. This will enable the Line Maintenance Division to initiate work orders for repairs by City forces.
- Partially close the hydrant so the drains open and water flows through under pressure for a few seconds, flushing the drain outlets. Restoration around hydrant base may be necessary after this is accomplished.
- Close the hydrant completely. Back off the operating nut enough to take pressure off the thrust bearing/packing.
- Remove one outlet-nozzle cap.
- Attach a section of fire hose, diffuser, or use an appropriate deflector type sheeting to protect the street, traffic, and private property from water discharged at high velocity, if needed.

- Open the hydrant sufficiently to observe flow and pressure.
- Operate branch valve with valve key to fully closed position (clockwise) to insure valve cuts off flow to hydrant. Then reopen branch valve and flush hydrant to remove any foreign material from interior or until water clarity is acceptable.
- Sound hydrant with listening device to insure no leaks are present. Document number of turns for branch valve and operational status of valve, condition of valve box, valve box lid, and housing. **(Make certain valve box lid is placed securely in box to prevent any vehicle or personal liability claims).**
- Close the hydrant and remove hose or diffuser, if used. Check the operation of the drain valve by placing the palm of one hand over the outlet nozzle. Drainage should be sufficiently rapid to create noticeable suction. If bleeders are not functioning properly, the hydrant barrel will have to be pumped out manually to a depth of one foot (1') below ground level and the coordinator notified of repairs needed.
- Check the main valve for leakage by using a listening device.
- All outlet-nozzles shall have the threads and condition of the gaskets checked. Lubricate all threads. Check the ease of operation of each cap.
- Check outlet-nozzle cap chains for free action on each cap. If the chains bind, open the loop around the cap until they move freely. Install new chains or s-hooks as needed.
- Place caps on outlet-nozzles. Tighten, and then back off slightly so they will not be excessively tight. Leave caps tight enough to prevent removal by hand.
- Painting:

Paint hydrant as necessary to protect the metal surface, as well as provide an attractive visual appearance. Painting is not to be performed when air temperatures are below 50° F. Hydrant tops should be painted in accordance with the color designated on the hydrant inspection work order. The current paint color will be recorded in the inspection form. The paint, top color and application shall conform to color scheme for capacity rating of each zone to be provided below.

Approximately ninety-five percent (95%) of the City's fire hydrants have hydrant barrels that are painted and will require one (1) finish coat of paint, aluminum in color. The remaining hydrant barrels are not painted and will require two (2) finish coats of paint. The specification for the aluminum paint is SSPC-Paint 101.

The Contractor shall provide all paint.

Prior to painting, the hydrant will be prepared by hand with a wire brush. Sandblasting will not be required.

Hydrant top paint color schedule:

NFPA 291, Chap. 3

Class C	Less than 500 GPM	Red
Class B	501-1000 GPM	Orange
Class A	1001-1500 GPM	Green
Class AA	1501 GPM & above	Light Blue

- If the hydrant is inoperable, it must be labeled “out of service” by bagging the hydrant and notifying the Data Quality Control Technician so that the City of Suffolk Fire and Rescue can be notified of the “out of service” status, as well as re-notified when the hydrant is placed back into service. Contractor to change Cityworks work order custom fields to “Hydrant Inspection Repair” and mark hydrant is out of service with a high priority.
- The Department of Public Utilities reserves the right to witness inspections, the performance of required maintenance, and to inspect all work performed under this contract. Any inspection or maintenance work which is performed by the contractor that is not in full compliance with this specification, shall be corrected to the satisfaction of the City within twenty-four (24) hours of notice. All payments due are subject to being withheld pending approved correction of an identified deviation from the requirements in these specifications. Payment of the entire invoice may be withheld until all deficiencies have been corrected.

D. Miscellaneous

If the Contractor is unable to locate the hydrant branch valve, they will be required to contact the City for further instructions. The Contractor will NOT be responsible for cleaning out debris from valve boxes.

The Contract will not be responsible for supplying cap gaskets, S-hooks, chains, etc. It will be the responsibility of the Contractor to note the missing/damaged parts on their Work Orders; the City will be responsible for supplying and replacing these items.

Hydrants will NOT need to be dechlorinated when flushed.

The last inspection of the City’s fire hydrants was performed in 2018.

ESRI ArcEngine and Cityworks software and licenses will be provided by the City.

E. Pricing

Painting will be priced separately, depending on whether the hydrant requires one (1) coat or two (2) coats of paint. Quantities stated on the BID FORM are estimated for the purpose of bid evaluation only.

MINIMUM CONTRACTOR QUALIFICATIONS/REQUIREMENTS

The contractor and/or his inspector must be experienced and have performed previous fire hydrant maintenance work. No less than three (3) references will be required.

27. **Additional Conditions:** The Conditions and Instructions in this solicitation are intended to apply to the resulting contract and shall supersede any conflicting terms offered. Any additional conditions a bidder intends be considered must be submitted with the bid and noted as an exception. Such exceptions may result in a finding that the submittal is 'non-responsive' to the bid, negating possibility of an award to that bidder. Contractual documents submitted by the successful firm after an award will not be accepted.
28. **Conflict:** In the event of a conflict between the contract documents, including these Conditions and Instructions, and the terms of a purchase order or related document issued by Purchasing, the contract documents shall control.
29. **Precedence of Documents:** In interpreting this Invitation for Bid (IFB) and resolving any ambiguities between the main body of the IFB (Sections A, B and C) and any supplemental documents or appendixes, Sections A, B, and C shall take precedence over any supplemental documents.
30. **Governing Document:** The solicitation document maintained by Purchasing, in the bid file, shall be considered the official copy. In the case of any inconsistency between bid documents submitted to the City, but not clearly listed as an exception, the language of the official copy shall prevail. Furthermore, any exception or change to the specifications made by the bidder may be cause to disqualify your bid.
31. **Negotiation:** Unless canceled or rejected, a responsive bid from the lowest responsible bidder shall be accepted as submitted; except that if the bid from the lowest responsible bidder exceeds available funds, the City may negotiate with the apparent low bidder to obtain a contract price within the available funds.
32. **Cooperative Agreements:** If authorized by the bidder(s), the resultant contract(s) may be extended to any jurisdiction within the Commonwealth of Virginia to purchase at the contract prices in accordance with the contract terms. Any jurisdiction using such contracts shall place its own order(s) directly with the successful bidder(s). It is the bidder's responsibility to notify the jurisdictions of the availability of contract(s).

33. **Prices:** Prices shall be stated in units of quantity specified. No additional charges shall be passed on to the City, including any applicable taxes, delivery, or surcharges. Prices quoted shall be the final cost to the City. In case of error in the extension of prices, the unit price shall govern.
34. **Corrections:** All prices and notations should be in ink or typewritten. Mistakes may be crossed out and corrections made in ink and must be initialed and dated by the person signing the bid.
35. **Brand Names:** The use of the name of a manufacturer, brand, make or catalog designation in specifying an item shall restrict bidders to the manufacturer, brand, make or catalog designation identified, unless qualified by the provision "or approved equal". If qualified by the provision "or approved equal" the Brand Names are used simply to indicate the character, quality and/or performance equivalence of the goods and/or services desired. The goods and/or services on which bids are submitted must be of such character, quality and/or performance equivalence that it will serve as that specified. In submitting bids on goods and/or services other than as specified, bidder shall furnish complete data and identification with respect to the alternate goods and/or services that they propose to furnish. The Contractor agrees to post in conspicuous places, available to employees and
